Portfolio: <https://augustoamado.vercel.app/#portfolio>

SKILLS

- **Advanced AI & Productivity:** multi-LLM orchestration (Claude/GPT/Gemini), custom agents, skills and MCP integrations, developer workflow automation, prompt engineering, RAG (hybrid vector + full-text search), AI output evaluation and validation
- **Backend:** Node.js, Express, Go, Python (FastAPI), strict TypeScript, REST APIs, Zod, authentication (OAuth/JWT), RBAC, webhooks
- **Frontend & UX:** React, Next.js, Tailwind CSS, shadcn/Radix UI, desktop/mobile responsiveness and flow validation
- **Data:** Supabase, PostgreSQL, pgvector, SQL
- **Payments & Integrations:** Stripe (metered billing), GitHub API, HMAC-validated webhooks, Google Sheets API, WhatsApp/Telegram, n8n, real-time flows (SSE + pub/sub)
- **DevOps & Environment:** Linux/WSL, Docker, Azure (Container Registry + Web Apps), CI/CD with GitHub Actions, Git
- **Testing & Quality:** Jest, supertest, technical review, regression prevention and CI/CD
- **Game dev:** C# · Unity

EDUCATION

Anhanguera Educacional: **Systems Analysis and Development** - In progress - **Expected graduation** in Dec/2026.

PROFESSIONAL EXPERIENCE

STARTUP 10XDEV, Belo Horizonte - Co-founder and Full Stack Developer

Jun/2025 - Present

Responsibilities:

- Develop **full stack applications** with **Next.js, Node.js, TypeScript** and **Supabase**, working on **APIs, dashboards**, integrations and **production workflows**;
- Implement integrations with **GitHub, Stripe, webhooks, OAuth, WhatsApp/Telegram** and real-time routines with **SSE/pub-sub**;
- Build **AI-powered product features**, including **multi-LLM workflows, provider routing, model consensus, streamed responses** and **token-cost control**;
- Create **agents, skills** and **MCP integrations** to automate

development workflows, standardize **technical context** and increase productivity with **human review**;

- Define and evolve **application architecture** with a focus on **maintainability, security, performance** and clear responsibility boundaries;
- Write and maintain tests with **Jest** and **supertest** to protect **business rules**, integrations and **critical flows** against regressions;
- Configure **development environments** and **deployments** with **Linux/WSL, Docker, Azure** and **GitHub Actions**, keeping **versioning, automation** and environments more predictable;
- Translate **business requirements** into technical solutions, validating **trade-offs, user impact** and **maintenance cost**;
- Structure projects, organize repositories, document **technical decisions** and define **development standards** for the team;
- Participate in **roadmap** prioritization and **validate** features on desktop/mobile, improving usability, responsiveness and the production product experience;
-

CONTI CONSULTORIA, Belo Horizonte - Development Assistant

Sep/2024 - Oct/2024

- Worked on **technical support, automation** and improvement of **internal IT processes**;
- Administered and supported **Office 365** and **Microsoft Azure** environments;
- Created **automations** with **Microsoft Copilot** and **dashboards/reports** in **Power BI**;
- Maintained workstations, installed **software/drivers** and provided **remote support**;
- Supported **technical documentation** and internal process organization.

NATTIVE TECNOLOGIA, Belo Horizonte - IT Intern

Sep/2023 - Sep/2024

Responsibilities:

- Provided remote and on-site **technical support** to users, including **ticket management** and **remote access**;
- Configured and maintained workstations, software, antivirus tools, **networks** and **VPN**;
- Supported **Office 365, LogMeIn, AnyDesk, TeamViewer** and the **Azure** portal;
- Gained initial experience with **SQL** databases in **support and diagnostic routines**;
- Maintained, cleaned and assembled computers.

RTI SOLUÇÕES INTELIGENTES, Belo Horizonte - Technical Support Specialist

Jan/2023 - Sep/2023

Responsibilities:

- Provided **technical support** to customers through **remote service** and **operational issue resolution**;
- Installed and configured software, **drivers, peripherals** and **output devices**;
- Configured **network data sharing** and supported **infrastructure routines**.
